

SUNFLEX® GREENHOUSE GROW TUBE SYSTEM

How It Works To Grow Your Seedlings Fast & Healthy

Trunk Builder® Stake BENEFITS

Unlike Rigid Wood, Bamboo & Metal Stakes Which Inhibit Normal Stem Development, Trunk-BUILDER Flexes In The Wind To Encourage Natural Stem Strengthening In A Process Known As Thigmomorphogenesis

Trunk Builder Is Virtually Unbreakable & Won't Rot - Keeping Your Trees Growing Straight & Strong Long After Other Stakes Like Oak, Pine & Bamboo Break Or Fail

Trunk Builder's Narrow Diameter & "Trunk-Safe" Rounded Top Allow This Stake To Be Installed Inside The Grow Tube Away From Climbing Rodents

No More Guessing About Proper Stake Depth - Exclusive Ground Line Marker Ensures Proper Installation Every Time

Stake Flexing Encourages Active Stem Movement To Trigger Stronger Root Growth

SunFlex® Grow Tube BENEFITS

Revolutionary Stem Guides™ (Patent Pending) provide "abrasion-resistant" transition zone for emerging tree stem and discourage perching by birds

Growth-Maximizing 4-in Diameter Is The Same For Every Grow Tube, Which Promotes Optimal Leaf Function And Uniform Growth For Every Tree

Proprietary, State-Of-The-Art Greenhouse Design, Filters & Diffuses Sunlight For Superior Plant Growth

Advanced Sunlight Filtering Keeps Grow Tube Temperature Safe, Even In The Hottest Growing Regions

Plantra's Cross-Flow™ Venting Boosts CO₂ Recharge & Allows Proper Dormancy

Greenhouse Microclimate Reduces Seedling Moisture Loss From Drying Winds

Nurture Zone lessens transplant shock and shields from weed sprays.
